SUMMARY

Computer engineering student with a solid background in programming and software development. He is passionate about technology and dedicated to solving real-world problems through innovative projects.

EDUCATION

Computer Engineering (level 4)

King Salman International University

CGPA 2.3

10/2022

LANGUAGES

Arabic	Native	English	Intermediate
--------	--------	---------	--------------

EXPERIENCE

- OOP
- Problemsolving
- DigitalCircuits
- DataStructure
- Negotiation
- CriticalThinking
- Leadership

courses

- Introduction to Cloud Computing
- Networking Basics
- Networking Essentials
- Network Addressing and Basic Troubleshooting
- Network Support and Security
- Network Defense
- Introduction to Cybersecurity
- Cybersecurity Essentials
- Cyber Threat Management
- Ethical Hacker
- Ethical Hacking Fundamentals
- Endpoint Security

TRAINING

ITI

I completed a 5-day IoT training course at ITI in the Smart Village, where I learned the fundamentals of IoT and successfully implemented various projects, including a smart parking system and a child movement monitoring system.

NTI

I am currently enrolled in the NTI Cyber Security Incident Response Analyst program under the Digital Egypt Initiative. The program is scheduled to conclude in October, and I am studying in Tier 2 .

AOI

Networking & Data Communication Skills
Proficient in designing, implementing, and managing data communication networks.
Experienced with network protocols, including TCP/IP, UDP, and Ethernet.
Skilled in configuring and maintaining network hardware such as routers, switches, and firewalls.
Knowledgeable in network security practices and tools to ensure data integrity and protection.
Adept at troubleshooting network issues to maintain optimal performance and reliability.
Familiar with wireless networking technologies and VPN configurations.
Strong understanding of network monitoring and performance optimization techniques.

IoT & Cybersecurity Training (AOI)

Hands-on training in securing IoT-based networks.
Solid understanding of IoT architectures and communication models.
Ability to identify potential vulnerabilities in IoT and networked systems.
Applied basic cybersecurity controls to protect networked and embedded systems.

Faisal Islamic Bank of Egypt – Training

Introduced to information security principles within a banking environment.
Gained exposure to securing internal networks and protecting sensitive data.
Understood the role of network infrastructure in secure data transmission.
Learned about access control policies, user management, and basic security procedures.
Familiarized with data protection, confidentiality, and institutional security policies.
Observed common security threats in banking environments and basic mitigation practices.

Objective/Training Section

Seeking training in Penetration Testing to enhance my skills in cybersecurity and ethical hacking.
